BT	2400			0.64	0.00116		0.64				--	--	0.052					

Rules to comply with:

1. The Power Range specified in the Tune-up procedure and the SAR Report must be the identical.
2. The maximum measured power in the SAR Report must be nearly equal to the highest Power specified in the Tune-up Power Range.
3. The maximum measured power in the RF Report shall not deviate more than 10% (on the linear scale) from the maximum power measured in the SAR Report, however always stay within the Tune-up Power Range.
