BT	2400			0.64	0.00116		0.64						0.052						

## Rules to comply with:

- 1. The Power Range specified in the Tune-up procedure and the SAR Report must be the identical.
- 2. The maximum measured power in the SAR Report must be nearly equal to the highest Power specified in the Tune-up Power Range.
- 3. The maximum measured power in the RF Report shall not deviate more than 10% (on the linear scale) from the maximum power measured in the SAR Report, however always stay within the Tune-up Power Range.
